

In reference to the ongoing COVID-19 pandemic, our providers and staff are taking the necessary precautions to ensure patient and staff safety. Our office locations are following all recommended CDC and Virginia Department of Health guidelines.

Please be prepared to be screened for COVID-19 symptoms upon arrival into any of our office locations. Patients are allowed one visitor to attend their appointment. Our employees are screened daily as well for your safety.

As of January 26, 2021, Dominion Internal Medicine does hope to receive the COVID-19 vaccines for our patients. However at this time, there is not enough vaccine to meet the request of every vaccinating entity in Virginia. We do not have a time frame of when we will be receiving the vaccine.

In the interim, please go to [www.rrhd.org](http://www.rrhd.org). If you a member of one of the current priority groups, please complete the survey labeled “Phase 1B Vaccine Survey for Individuals 65 or older” or “Phase 1A/1B vaccine Survey for Essential Workers.” Those without internet access may call (540) 308-6072.

Please check the Virginia Department of Health weekly Facebook posts for updates on the vaccines: Please visit: [www.Facebook.com/RappRapHD](https://www.Facebook.com/RappRapHD)

Patients may also call the Virginia Department of Health COVID Hotline at 540-316-6302.

To hear more information on COVID-19, please refer to the Virginia Department of Health and CDC websites for the most up to date information on quarantining, exposures and vaccines.

Once the vaccine becomes available to our office, we will notify our patients accordingly.

We hope you and your family stay well during these unprecedented times.
